

FOR IMMEDIATE RELEASE

ImageScan and MetaSource Advance Cloud-Based Revenue Cycle Management

LANHAM, Maryland, May 21, 2013 – ImageScan Inc., a U.S.-based, leading software solutions provider, and MetaSource, a leading business process outsourcer (BPO), announced today that *RevenueExpress*®, ImageScan’s revenue cycle management offering, along with MetaSource is advancing cloud-based revenue cycle management for health care. *RevenueExpress* can now make transactional images and data accessible and complete from multiple sources across a health care system with the integration of MetaStor, a cloud-based content management system from MetaSource.

The integrated enterprise solution fills a critical void in most revenue cycle systems by enabling bank lockboxes and other payment systems to acquire, translate and deliver transactional content with high accuracy and efficiency. The integration of these systems improves the claims reconciliation process through increased accuracy and validity of data acquired from electronic ANSI 835 formats, ERAs, paper EOBs and translated non-standard data formats.

“Health care providers are increasingly faced with multiple sources and forms of payments,” says David Wright, ImageScan’s Sales Manager for Health Care Systems. “*RevenueExpress* facilitates the reconciliation process by reformatting images and data to assist customers in meeting HIPAA and PCI compliance requirements, which now can be accessed by all stakeholders across the enterprise through the integration with MetaStor.”

MetaStor’s cloud-based deployment of EMC ApplicationXtender® provides the needed foundation for anytime, anywhere, role-based access to retrieve, view, route and manage transactional data. MetaSource’s Vice President of Content Management Solutions, Mario Duckett, adds, “The workflow-centric nature of MetaStor combined with *RevenueExpress* provides greater ease of use and flexibility, improved data integrity, enhanced visibility and lower ongoing maintenance to the revenue cycle management process.”

About MetaSource

Headquartered in Bristol, Pennsylvania, MetaSource is a leading business process outsourcer (BPO) of enrollment solutions, U.S. customer care, and content management solutions serving clients throughout the United States. MetaSource supports more than 4,000 installations of the EMC ApplicationXtender Content Management Product Suite through a network of over 130 Channel Partners and provides clerical-based and customer-care BPO solutions through a network of SOC / AT101 (formerly SAS 70) and PCI Level 1 facilities located in the US, Mexico, India and China. MetaSource employs over 700 people worldwide.

EMC is a registered trademark of EMC Corporation in the United States and other countries. All other trademarks used herein are the property of their respective owners.
