

**FOR IMMEDIATE RELEASE**

## **RevenueExpress® goes Virtual**

LANHAM, Maryland, March 27, 2012 – ImageScan Inc., the U.S.-based, leading software solutions provider for accounts receivables management and transactional content unification, announced today that RevenueExpress, ImageScan’s 5010 compliant healthcare revenue cycle management solution, is now successfully deployed in a fully virtual customer environment.

“Virtualization addresses many problems common in customer sites,” said Hanna Jabbour, Senior Product Manager of RevenueExpress for ImageScan. “Complex issues such as rising real estate costs, high power consumption and ongoing maintenance expenditures all play leading roles in companies’ purchasing decisions. Virtualization helps customers meet these issues head on, while greatly simplifying hardware procurement. Customers can react to volume scalability at a lower cost and in a timelier fashion.”

Configured with Windows 7 and Windows Server 2008 R2, every workstation and server for RevenueExpress runs in a 64-bit virtual environment utilizing VMware vSphere, the industry’s leading virtualization platform. This virtual environment of RevenueExpress boasts a reduced infrastructure footprint, delivers high availability, and demonstrates quicker recovery times, proving to be more attractive than its standard physical hardware implementation.

“Operating ImageScan’s RevenueExpress in a virtual environment enables us to offer EOB conversion services with greater efficiency at lower costs to our customers,” stated Chuck Ramsburg, Vice President of Healthcare Services for MetaSource LLC. “This virtual environment is instrumental for supporting our rapid growth within medical banking services.”

MetaSource is a leading business process outsourcer (BPO) provider of back office services, and offers RevenueExpress to hospitals/providers, medical billing services, and financial institutions that process medical

billings on behalf of their clients. ImageScan is proud to work with MetaSource on this project, and excited to participate with the company as its vision for medical banking services continues to expand.

**About ImageScan Inc.**

ImageScan Inc. is a U.S.-based, leading software solutions provider for accounts receivables management and transactional content unification. Founded in 1992, ImageScan is a top supplier to Tier 1 financial institutions in the U.S. and a Microsoft-certified partner. Servicing Fortune 500 customers, ImageScan offers industry-specific solutions and services to organizations within banking, healthcare, government, outsourcing, non-profit, insurance and fulfillment. By deploying solutions in a timely, non-disruptive, and cost-effective manner, ImageScan offers customers a reduced cost structure, optimized business intelligence, increased accuracy and the ability to provide differentiated services to their marketplace. With unmatched innovation and superior customer service, ImageScan's solutions are fully scalable and operate in some of the most demanding of HIPAA, PCI and anti-fraud environments to meet customers' evolving needs.
